

# Monthly Immunization Update

September 2025

Dear Schools and partners ,

The purpose of this newsletter is to deliver quick and meaningful updates to support our schools and partners in a variety of vaccine settings, and maintain our connection with all of you. We welcome your questions and comments. Please feel free to share this newsletter with all of your colleagues. Thank you !

## *August Back To School Tdap Event Recap*

On behalf of the Immunization Program at Ventura County Public Health, we extend our sincere thanks to all the schools and community partners that shared our back-to-school Tdap event flyer! Thanks to your support, 94 doses of Tdap were administered to Ventura County Students. We appreciate your continued commitment to promoting the importance of immunizations and ensuring students stay up to date on their required vaccines for school.

## *Remember Your Resources*

As school is starting back up, now is a good time to go over the resources that are available to you. These resources will ensure you have a smooth transition into the new school year.

### Shots For School

You'll find helpful trainings, informational handouts, updated news, how-to's, parent call scripts, and so much more!

### The School and Child Care Roster Lookup

We encourage your school to use the School and Child Care Roster Lookup Tool (SQRL) offered through [CAIR Hub](#) to help determine if a child has received all vaccines required for enrollment.

### FAQ's

Frequently asked questions are also available on the Shots for School webpage!

<i>Announcements</i>	2

## Tools to Record Your Vaccinations

Today we move, travel, and change health care providers more than we did in previous generations. Finding old immunization information can be difficult and time-consuming. Therefore, it is critical that you keep an accurate and up-to-date record of the vaccinations you have received. Keeping an immunization record and storing it with other important documents (or in a safe place) will save you time and unnecessary hassle.

Ask your doctor, pharmacist or other vaccine provider for an immunization record form or download and [use this form](#). Bring this record with you to health visits, and ask your vaccine provider to sign and date the form for each vaccine you receive. That way, you can be sure that the immunization information is current and correct.

If your vaccine provider participates in an [immunization registry](#), ask that your vaccines be documented there as well.

### Vaccine Administration Record for Adults

Before administering any vaccines, give the patient copies of all pertinent Vaccine Information Statements (VIS) and make sure they understand the risks and benefits of the vaccines. Always provide or update the patient's personal record card.
